Your Benefit in concrete Terms: Content, Organization and Structure of the Book

Briefly and concretely this is your benefit from this book: You support certified climate protection projects, quickly receive compact information and checklists from experts as well as access to AI extensions and the possibility to individually live your inspirations as an experience. Because many people turn the hamster wheel day in and day out and want a nicer, better and easier life. It doesn't have to remain a dream and the solution to the problem is passive income. Unfortunately, very few people are really familiar with the topic of financial investments and there are as many opinions about correct financial planning as there are experts. So if you want to earn money by investing properly, you would do well not to lose track of the jungle of financial products between stock trading with individual values, ETF and index funds, gold, real estate, etc. Therefore, it makes sense to deal with your own wealth planning in more detail, after all, savings and thus the pension, which is important for retirement, are only destroyed by inflation.

You will receive valuable resources through this [unique publishing concept](#) that will enhance your knowledge, stimulate your creativity, and make your personal and professional goals achievable. This allows you to discover new ways, expand your thinking, and improve your skills to experience success. You will receive concrete advice, proven methods, and strategies to overcome challenges and overcome obstacles. By providing specific action steps and practical guidance, you will learn how to define your goals and develop plans to progress step by step. The clear structure and our special, highly detailed table of contents support you in quickly finding the desired information and implementing it directly into practice.

This is not only contributed by the expert articles of renowned experts but also by numerous inspirations from successful managers, entrepreneurs, and other exciting personalities. Their stories and experiences serve as vivid examples of how challenges can be overcome and goals can be achieved. Through their inspiring narratives, you gain insights into proven strategies and practices that you can apply to your own situations. Different, and potentially contradictory, aspects of the topic are deliberately addressed. This allows you to examine, reflect on, and weigh the various pros and cons optimally. This ultimately enables you to gain different perspectives and improve your knowledge to develop a deeper understanding of complex topics and find innovative solutions.

Information as desired with Membership Discounts, eCourses, Workbooks, and custom, individual eBooks

Finding your dream job: a job you love

// By Sir Ken Robinson

A few years ago, someone in Oklahoma told me an old story that shows how beautiful and self-evident it is to live in harmony with oneself.

The story of the fish

Two young fish swim down a river as an older fish swims past them in the opposite direction. He says, "Good morning, boys. How is the water?" They smile at him and keep swimming.

After a while, one young fish turns to the other and asks him: "What is water?" His natural element is so natural to him that he doesn't even know that he is in it.

In your own element

Being in his own element feels so. If you do something that is so completely self-evident, with which you are so in harmony, you feel that you are doing exactly what you like.

How is it by you? Are you in your element? Do you know what your element is or how you can find it? There are so many people who lead their lives in their element and have the feeling that they are doing exactly what they are created for.

Talent and individual passion

Many others do not do this - they have little joy in their lives, just stand by and long for the weekend.

The element combines natural endowment with individual passion. First of all, it means you do something for which you have a talent at home. Be it guitar or play basketball, cook, teach or deal with technology or animals.

Accounting as passion?

People who are in their element can be, for example, teachers, designers, housewives, entertainers, physicians, firefighters, artists, social workers, accountants, clerks, librarians, foresters or soldiers. You can have all sorts of professions.

I recently spoke to a woman in her sixties who has been an accountant all her life. As a child, she understood numbers immediately and was fascinated by

mathematics. She just had it on. Knowing what skills you have and what that really means is an important step in finding your own element.

Choose a profession that you love

But being in his element means not only doing what one can do well. Many people can do things for which they are not interested. Being in his element also means loving what one does.

The bookkeeper agreed. She had not only talent in calculating, she also liked it. For them, bookkeeping meant no effort. That was exactly what she really liked.

As Confucius said: "Choose a job you love and you don't need to work a day in your life." In my element Confucius did not know, even if it sounds like it.
